

Say each letter sound and trace over the letters in the boxes. Which sound does the word stars begin with?

Lesson Song – Twinkle, Twinkle Little Star

Twinkle, twinkle, little star,
How I wonder what you are,
Up above the world so high,
Like a diamond in the sky.

Twinkle, twinkle, little star,
How I wonder what you are!
When the blazing sun is gone,
When there's nothing he shines upon,
Then you show your little light,
Twinkle, twinkle, through the night.

Twinkle, twinkle, little star,
How I wonder what you are!
In the dark blue sky so deep
Through my curtains often peep
For you never close your eyes
Til the morning sun does rise

Twinkle, twinkle, little star
How I wonder what you are
Twinkle, twinkle, little star
How I wonder what you are

LESSON 10

THIS WEEK'S BIG QUESTION

What do the stars tell us about God?

LESSON RHYME

S—S—Stars

Light up the nighttime sky

S—S—Stars

God watches from on high

The Lights Are Set in the Heavens

God created the sun to give light and warmth to the earth. Without the sun there would be no life on earth. The earth turns around on its axis each day. When the part of the earth we live on faces the sun it is day. When the part where we live is turned away from the sun it is night.

God also created all the stars out in the heavens. We can see the stars at night when the sun isn't shining. Stars are like the sun they are just farther away. They are very hot and give off lots of light. That is why we can see them even though they are a very, very long way away. God made the sun for the daylight and he made the stars to shine at night.

Describe the difference between the sky in the day and at night.
