

Say each letter sound and trace over the letters in the boxes. Which sound does the word solar system begin with?

Lesson Song – Twinkle, Twinkle Little Star

Twinkle, twinkle, little star,
How I wonder what you are,
Up above the world so high,
Like a diamond in the sky.

Twinkle, twinkle, little star,
How I wonder what you are!
When the blazing sun is gone,
When there's nothing he shines upon,
Then you show your little light,
Twinkle, twinkle, through the night.

Twinkle, twinkle, little star,
How I wonder what you are!
In the dark blue sky so deep
Through my curtains often peep
For you never close your eyes
Til the morning sun does rise

Twinkle, twinkle, little star
How I wonder what you are
Twinkle, twinkle, little star
How I wonder what you are

LESSON 11

CREATION AND THE BEGINNING OF HUMAN HISTORY

THIS WEEK'S BIG QUESTION

Why can all people know God through his creation?

LESSON RHYME

S—S—Solar System
Planets circle round the sun
S—S—Solar System
Earth is the special one

The Design of the Solar System

The earth is one of the planets that circles around the sun. Earth is a special planet. It is the only planet where there are living things.

Living things need air, water and light. They also need ground to live on. The other planets are part of God's design but they don't have the things needed for life. God loves the earth and made it as a special place for people and animals to live.

Discuss why each of the four things needed for life are important: Air, water, light and ground.
