

Why is creation very good?

Page 2

On the second day God separated
water from the sky.

He made a place for fish to swim
and where the birds could fly.

Next he gathered water
together in a space.

And when dry ground appeared
for living plants he had a place.

Page 3

On the third day he created plants,
each growing from a seed.

Water, ground, air and light,
God gave them what they need.

He looked around at growing plants
and said that they were good,

Each producing their own kind
in the way he said they should.

Page 4

On the fourth day God put in the sky
the sun and every star,

Causing them to shine their light
on earth from quite afar.

The moon he made to circle earth,
the earth moves round the sun.

God knew and said that it was good,
when the day was done.

Page 5

On the fifth day God made living things
to fill the sea and air.

The birds he made with feathers
to fly without a care.

In the water can be found
creatures of the sea;

Each and every living thing
the way God made them be.

Page 6

On the sixth day God made animals
to move along the ground.

Then in his image he made man
and told him to abound.

When God looked at his creation,
he called it very good.

Very good it is when it functions
in the way God said it should.

Page 1

His first act of creation,

God said, "Let there be light."

And light was all around,

shining very bright.

He separated light from dark

and called the darkness night.

The first day came to pass

because of God's creative might.

Why is creation very good?

G—G

Make sign of "G"

Good

Thumbs up sign

God designed

Lift arms up in air

all things to be

Point R index finger out & move in horizontal circle

G—G—Good

Same as above

God liked what

Thumbs up sign, shake head "yes"

he did see

R hand above eyes & look around
